A Holistic and Scalable Solution for Research, Innovation and Education targeting Energy Transition

The European Green Deal investment plan is mobilizing at least €1 trillion of investments over the course of next 10 years to arrive to a climate-neutral and circular economy.

According to the European Commission Setis Magazine (No.19 - December 2018) focussing on jobs and skills, the Energy transition is opening up new work opportunities, and new skills are needed for a low carbon society. A new era is born.

Get involved in this change with ASSET project which offers the opportunity to:

- acquire the skills required for green jobs in the energy transition
- be re-skilled
- understand energy transition and become an energy citizen

Improve your green skills with our online courses and get ready for the jobs of the future.

Online courses are free and open to students, energy sector workers, and to the general public
